Reimbursement of Medical Devices in Germany

The present document refers to the new requirements on the reimbursement of medical devices issued by the *Sosyal Güvenlik Kurumu* on March 25th 2010, and to herewith provide evidence on the reimbursement of the following products currently available within the German healthcare system of the German producing company:

Hearing aids fall in the category of medical aids. The German statutory health insurance reimburses medical aids, including hearing aids, when the product is listed in the official Register of Medical Aids. Each product listed in the register is identified by a specific medical aid number. The above-mentioned products are listed in the Register of Medical Aids as evidenced by the medical aid numbers stated above.

The Register of Medical Aids is maintained by the Federal Association of health insurances. This task is being performed is under legal supervision of the Federal Ministry of Health.
